

MANDIRA K SHETTY

Bengaluru, India | mandira.kshetty@gmail.com | +91 ***** | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science Engineering graduate with three technical internships across fintech, telecom, and healthtech, building full-stack and backend systems in Python, Java and JavaScript. Experienced designing REST APIs, debugging and testing production applications, and applying AI/ML to real-world problems such as fraud detection and automated log analysis. Comfortable owning a feature end-to-end, from design through deployment, while collaborating in Agile, cross-functional teams.

TECHNICAL SKILLS

- **Languages:** Java, Python, C/C++, JavaScript/TypeScript, SQL, HTML/CSS
- **Backend & Frameworks:** Spring Boot, JDBC, REST API Design, Flask, FastAPI, React.js
- **Database & Search:** PostgreSQL, MySQL, SQLite, JSON/NoSQL, semantic search (Sentence Transformers, FAISS), RAG pipelines
- **AI/ML:** XGBoost, Random Forest, Isolation Forest, SHAP, Scikit-learn, LLMs, GenAI, AI Agents, Feature Engineering, Pandas, NumPy
- **Engineering Practice:** Debugging & Testing (JUnit), Code Review, CI/CD (GitHub Actions), Agile/SDLC, Git/GitHub, Jira, Confluence, Postman, Google Cloud Platform (GCP)

EXPERIENCE

Software Engineering Intern | Broadridge Financial Solutions, Bengaluru, India *Jan 2026 – Jul 2026*

- Collaborated in an Agile team across the full SDLC to write extensible, maintainable full-stack code (React, FastAPI, PostgreSQL) for a release-scheduling portal, integrating ITSM (CRQ) workflows and optimizing queries to cut response time from 15s to 2s.
- Built a RAG-style LLM chatbot (OpenAI API) and a Scikit-learn classifier to auto-categorize releases, plus a Jira ID lookup tool and bug-template generator, reducing manual ticket-creation effort from 25 to 5 minutes per employee; also completed Java Full-Stack training, building a practice application with Spring Boot and JDBC.
- Debugged and resolved critical backend processing failures and trade-capture validation discrepancies through systematic testing and log/telemetry analysis, ensuring the stability, reliability, and security of production financial systems; participated in code reviews with senior engineers to learn coding standards and best practices.

Machine Learning Trainee | Tech Mahindra, Bengaluru, India *Sep 2025 – Dec 2025*

- Designed the machine-learning architecture for a RAG-based log analysis system for telecom monitoring, using Sentence Transformers and FAISS for semantic search across large volumes of enterprise application logs and telemetry.
- Built a Streamlit monitoring dashboard for automated root-cause analysis, cutting troubleshooting time by 70% through log-similarity matching and knowledge-base retrieval — improving system observability and dependency visibility.

Machine Learning Intern | Graphene Health Tech Pvt. Ltd., Bengaluru, India *Sep 2024*

- Built and tested a chatbot on Google's GEMMA-2B-it model with prompt engineering, plus a Streamlit interface supporting PDF upload, content-based Q&A, chat history, and custom commands.

PROJECTS

AI-Driven Continuous Authentication Platform for Digital Banking — (Python, Flask, MySQL, XGBoost, Isolation Forest, SHAP)

- Built a secure banking platform (Flask, MySQL) with login, balance checks, and fund transfers, integrating XGBoost and Isolation Forest models for fraud detection at 92.7% accuracy and sub-100ms latency; implemented SHA-256 authentication and SHAP-based explainability for each trust decision.

Parkinson's Disease Stage Prediction — (Python, scikit-learn, XGBoost, Streamlit)

- Conducted predictive modeling on the PPMI dataset to forecast Parkinson's disease stages using XGBoost after 98% dimensionality reduction, identifying top clinical predictors through feature-importance analysis.

EDUCATION

M. S. Ramaiah University of Applied Sciences, Bengaluru, India *Nov 2022 – July 2026*

Bachelor of Technology in Computer Science Engineering, **CGPA: 9.29/10**

Relevant Coursework: Data Structures & Algorithms, AI/ML, Data Science, OOP, Computer Networks

CERTIFICATIONS

IT Fundamentals for Cybersecurity (IBM) • Introduction to Cybersecurity (Cisco) • Fundamentals of Cyber Security (Google)
• The Joy of Computing Using Python (NPTEL) • AI Essentials (Google) • Gen AI Academy (Google Cloud & H2S)

RESEARCH & LEADERSHIP

- **Research** — Built an ML-driven eco-routing platform (XGBoost, Random Forest, Streamlit, Google Maps API) reducing predicted CO2 emissions by 40%; presented at ICASF 2025, Abu Dhabi.
- **President, The Startup Society, RUAS** — Led a 300+ member club, organizing workshops, competitions, and speaker sessions to build a campus startup culture.
